

LightSPEED Classroom Amplification

LightSPEED Classroom Amplification

REDCAT™
Infrared Classroom Amplification Technology

The New Sound of Achievement

LightSPEED offers a variety of classroom amplification solutions to meet the needs of every learning environment. All of our systems are simple and easy to use, integrate well with multimedia, and have a long, useful life.

Designed for...

Primary schools with older construction or installation challenges.

The Next Generation in Classroom Amplification

There is no easier way to help students improve academic achievement. The REDCAT™ is an all-in-one system that works right out of the box and requires no installation. This system can be mounted on the wall like a picture frame, or placed on a bookshelf or desktop. It distributes sound evenly throughout the classroom and is specifically engineered to deliver outstanding voice intelligibility at a surprisingly low price.

Features:

- All-in-one — amplifier, speaker, receiver and infrared sensors
- Wall mount or table top — no installation required
- Distributes clear, consistent sound in rooms up to 1200 square feet
- LightMic™ — the virtually unbreakable classroom microphone

Children Who Hear Every Word Learn More

Numerous studies and thousands of working classrooms nationwide have proven that simple, easy-to-use classroom amplification is an effective tool for increasing student achievement and teacher effectiveness. Every educator wants the children they teach to be able to listen and learn faster. Now those

children can—without changing curriculum or teaching style.

LightSPEED Classroom Amplification creates an environment where each child has an equal opportunity to clearly hear the teacher's instruction. By hearing what's being taught, every child benefits and enjoys a higher degree of achievement.
